 October 24-26 • Caesars, Atlantic City

Navigation Masters Course

October 24-26, 2024

Elevate your Oncology Navigation Program with this transformative Breast Health Navigation Masterclass! Engage innovative strategies that will revolutionize patient care and navigation program leadership. Designed for navigators and administrators, this immersive program will empower you with advanced techniques for enhancing patient outcomes and experiences. From crafting personalized navigation plans to unlocking new reimbursement opportunities, this masterclass will equip attendees with the skills and knowledge to navigate the complexities of breast health care at a master’s level in the field of navigation. Through interactive sessions and hands-on learning, expertise and growth will be developed and enhanced in a masterclass format. Join us to review collaborative care, gain advanced skills, and conquer care barriers. Seize this opportunity to soar to new heights in Breast Health Navigation and embrace this rare opportunity to learn in a masterclass way!

This Masterclass is designed as a stand-alone offering to enable navigation leaders and advanced navigators to enhance their skills beyond traditional base-level methods. Coursework includes practical navigation case studies, intentional networking, study presentations, and interactive sessions unlike any other course offered for Oncology Navigation Programs.

Nicole Centers, MBA, BSN, RN, OCN, CBCN, BHCN, FNCBC; Kristi Denny,
 RT(R)(M)(BS), ARRT, BHCN, CGRA;

 CBCN; Kristi Bobolis, MD

Day 1 Thursday October 24, 2024

11:45am	12:00pm	Welcome Opening Housekeeping
12:00pm .5	12:30pm	Positioning the Proposition- Modalities of Care
12:30pm .5	1:00pm	Bearing the Compass Part 1- Precision Diagnostics
1:00pm .5	1:30pm	Bearing the Compass Part 2 - Targeted Therapies
1:30pm 1.0	2:30pm	Hefting the Sails - Bringing it Together
2:30pm .5	3:00pm	Buoy Up – Navigators Don’t Steer!
3:00pm	3:30pm	Break
3:30pm .5	4:00pm	Teams Advance and Colleagues Support
4:00pm .5	4:30pm	Navigator versus Navigation
4:30pm 1.0	5:30pm	Case Studies
5:30pm	5:45pm	Closing of the day

5 Credits

Objectives:

- Develop strategies to improve patient outcomes and experiences
- Enhance skills and knowledge in Breast Health Navigation
- Empower navigators with advanced strategies to provide comprehensive care
- Highlight the importance of multidisciplinary care teams in oncology
- Learn how to enhance effective communication among breast professionals
- Learn key concepts in care coordination
- Explore how precision medicine and molecular diagnostics are changing breast cancer treatment paradigms, including targeted therapies and personalized medicine approaches.
- Gain knowledge into the latest advancements in cancer immunotherapy including the role of the immune system in breast cancer control.

Day 2 Friday October 25, 2024

7:45am	8:00am	Opening
8:00am .5	8:30am	Honoring the Team – MDC or Tumor Boards
8:30am .5	9:00am	Upgrading Survivorship
9:00am .5	9:30am	The Heft of Palliative Care & Hospice Care
9:30am	10:00am	AM Break
10:00am .5	10:30am	Dignifying the Patient: Ethical and Legal Autonomy
10:30am .5	11:00am	SDoH: Pushing them Front and Center
11:00am .5	11:30am	Hand-off to Who? Resources for Solo Navigators
11:30am .5	12:00pm	Elevating Your Role as Navigator, Not Hole Filler
12:00pm	1:30pm	Lunch Break
1:30pm .5	2:00pm	Thriving Through The Storm – Board Room Talks on Program Goals
2:00pm .5	2:30pm	Mitigating Fears: Testing and Delayed Results
2:30pm .5	3:00pm	Upgrades and Downgrades: Multiple Primaries
3:00pm .5	3:30pm	Stimulating the Senses- Time Management and Self Preservation
3:30pm	4:00pm	PM Break
4:00pm .5	4:30pm	We All Fall Down: Caregiver Stress Among Navigators
4:30pm .5	5:00pm	Steeling Your Ship: Ethical and Legal Autonomy
5:00pm	6:00pm	Case Studies

6:00pm	Close for the Day with Comments	

7.5 Credits

Objectives:

- Optimizing patient outcomes through collaborative approaches
Manage the integration of palliative care into active care models for symptom management and care planning.
- Supporting transitions of care through end-of-life decision-making and resources for patients at varying points in their life cycle.
- Address healthcare disparities in cancer outcomes and barriers to access.
- Gain cultural competence, and strategies for delivering equitable care to all patients regardless of background or socioeconomic status.
- Explore financial challenges in breast health including insurance coverage requirements and regulations, financial assistance programs.
- Understand how navigating billing and reimbursement, and supporting patients with financial toxicity improves outcomes.
- Advocate for patient self-empowerment through patient education about treatment options, clinical trials, resources, and community support services, advocating for patient needs within the healthcare system.
- Enable success in professional appearance, professional presence, colleague engagement, and professional behaviors to convey confidence, credibility, and authenticity.
- Enable success in professional practice and leading teams of navigators to success to implement quality core programming.
- Assist navigators to empower their patients to lead to job retention and job satisfaction enhancing overall employee engagement.

Day 3 Saturday October 26, 2024

7:45am	8:00am	Opening
8:00am .5	8:30am	Animating the Dormant: Funding the Needs of Your Program
8:30am .5	9:00am	Heighten the Stance: Clinical Trials and Research Opportunities
9:00am .5	9:30am	Leading Towards Tomorrow
9:30am	10:00am	AM Break
10:00am .5	10:30am	Staring Back at the Moon: Resume Writing, Goal Setting, Publishing
10:30am .5	11:00am	Flying Through the Atmosphere: Ensuring Success for Your Patient's Journey
11:00am .5	11:30am	Looking Down on the Clouds: Breaking Barriers and Building Gates
11:30am .5	12:00pm	No Hands! Trusting Your Skills
12:00pm	1:30pm	Lunch
1:30pm 1.0	2:30pm	Concepts of Care Review
2:30pm .5	3:00pm	Concepts of Professional Development Review
3:00pm	3:30pm	Elevating Your Career: Volunteering and Certification

.5		
3:30pm	3:45pm	PM Break
3:45pm	4:15pm	Preparing Key Concepts of Care
.5		
4:15pm	4:45pm	Final Presentations
1.5		
5:45pm	6:00pm	Close for the Day with Comments

7.5 Credits

TOTAL Credits for 2.5 days 19

Objectives:

- Comprehend importance of clinical trials in advancing cancer care especially relating to breast cancer. Understanding trial eligibility, patient enrollment processes, and navigating patients through trial processes.
- Focus on providing comprehensive psychosocial support to breast cancer patients of all ages, addressing their emotional, social, and survivorship needs. Strategize long-term follow-up care and side effects.
- Enhance skills in verbal and non-verbal communication in patient-to-healthcare provider communications. Strategize and utilize techniques to navigate patients with learning impairments and social impediments to care including high-risk lifestyle choices.
- Integrate care provided into written reports of care and transform data into reports to prove value and show metrics in the implementation of breast navigation programming. Proving quality in navigation care.
- Enhance skills in verbal and non-verbal communication in patient-to-healthcare provider communications. Strategize and utilize techniques to navigate patients with learning impairments and social impediments to care including high-risk lifestyle choices.
- Integrate care provided into written reports of care and transform data into reports to prove value and show metrics in the implementation of breast navigation programming. Proving quality in navigation care.
- Discuss the importance of clinical trials in advancing cancer care especially relating to breast cancer. Understanding trial eligibility, patient enrollment processes, and navigating patients through trial processes.
- Discuss the importance of clinical trials in advancing cancer care especially relating to breast cancer. Understanding trial eligibility, patient enrollment processes, and navigating patients through trial processes.
- Networking with focused intent during breaks and meals.

Overall Objectives to 20 CEU

- Ethical and Legal Considerations in Breast Health Navigation
- Exploring ethical dilemmas in oncology care, patient autonomy, confidentiality, informed consent, advanced directives, and legal aspects of end-of-life decision-making.
- Course Piloting and Dead Reckoning in Patient Care
- Enhance skills in verbal and non-verbal communication in patient-to-healthcare provider communications. Strategize and utilize techniques to navigate patients with learning impairments and social impediments to care including high-risk lifestyle choices.
- Navigation Documentation
- Integrate care provided into written reports of care and transform data into reports to prove value and show metrics in the implementation of breast navigation programming. Proving quality in navigation care and overall cancer programming.

- Healthcare Equity and Disparities of Care
- Address healthcare disparities in cancer outcomes, barriers to access, cultural competence, and strategies for delivering equitable care to all patients regardless of background or socioeconomic status.
- Multiforma Navigation
- Explore financial challenges in breast health including insurance coverage requirements and regulations, financial assistance programs, navigating billing and reimbursement, and supporting patients with financial toxicity.
- Discuss the importance of clinical trials in advancing cancer care especially relating to breast cancer. Understanding trial eligibility, patient enrollment processes, and navigating patients through trial processes.
- Focus on providing comprehensive psychosocial support to breast cancer patients of all ages, addressing their emotional, social, and survivorship needs. Strategize long-term follow-up care and side effects.
- Manage the integration of palliative care into active care models for symptom management and care planning. Supporting transitions of care through end-of-life decision-making and resources for patients at varying points in their life cycle.
- Novel and Cutting Edge Therapies
- Explore and research new strategies emerging in breast cancer prevention and screening methods
- Delve into the latest advancements in cancer immunotherapy including the role of the immune system in breast cancer control.
- Explore how precision medicine and molecular diagnostics are changing breast cancer treatment paradigms, including targeted therapies and personalized medicine approaches.
- Professional Growth and Development
- Enable success in professional appearance, professional presence, colleague engagement, and professional behaviors to convey confidence, credibility, and authenticity.
- Leadership Skills Enhancement
- Enable success in professional practice and leading teams of navigators to success to implement quality core programming.
- Assist navigators to empower their patients to lead to job retention and job satisfaction enhancing overall employee engagement.
