

Clinical Breast Assessment: The ABCs of Clinical Breast Care & Physical Examination.

Nathalie Johnson, MD, FACS & Jaclyn White, NP

Clinical Breast Assessment (CBA) is a comprehensive course that focuses on the importance of breast examination and the significance of physical findings as it relates to the clinical care of breast patients. The course will provide updates in risk assessment, breast imaging, management of benign breast conditions, and cancer recurrence as it relates to clinical assessment and evaluation. Attendees will participate in hands-on, interactive clinical case presentations and breast examinations.

There will be a Certificate of Attendance provided following completion of the course.

Sunday, March 23
